Published by the Division of Budget and Planning, Office of Administration

The Division of Budget and Planning was formed in July of 1975 with the merger of the Division of Budget and the Division of State Planning and Analysis within the Office of Administration. The state planning unit of the Division is composed of the former Office of Planning, Department of Community Affairs. The powers, duties and functions of the Department of Community Affairs relating to statewide planning (Chapter 251, RSMo 1969) were transferred to the Office of Administration by the Omnibus State Reorganization Act of 1974.

Personnel with a contributing role in the production of documents and publications of the Division include:

**Stephen C. Bradford**  
(Assistant Director for State Planning)

<b>Richard Hanson</b>	<b>Eddie Barnett</b>
(Coordinator, Statewide Planning)	(Coordinator, Intergovernmental Relations)

**Arthur Schmidt**  
(Special Projects Assistant)

## **PREFACE**

The data on which this document is based are from the U.S. Department of Commerce, Bureau of Economic Analysis, *Regional Employment by Industry, 1940–1970*. The Public Affairs Information Service, University of Missouri–Columbia aggregated the county employment by industry data to the regional level and calculated the analytical tables included. The Division of Budget and Planning, Missouri Office of Administration provided the narrative and graphs.

There are six tables provided for the State of Missouri and each of Missouri's twenty regional planning commission areas (Chart 1 shows the boundaries of and the counties included in each of the regions). The first table shows employment by industry for the years 1940, 1950, 1960 and 1970. The second table shows the percentage breakdown by industry of total employment for the same years. The third table shows the region's percentage share of the state's employment (Missouri's share of the United States) by industry for the four time periods. The percentage of the population employed in each industry is shown in the fourth table. The fifth table shows the percentage change in employment by category from 1940 to 1950, from 1950 to 1960, and from 1960 to 1970. Location quotients are shown in the last table. Location quotients compare the distribution of employment by industry in each of the regions with the distribution in Missouri (and Missouri versus the United States). A value of 1.00 indicates the same share in both areas; a value less than 1.00 indicates the industry is less important in the region than in Missouri and a value greater than 1.00 indicates the industry is more important for the region.

Comparable detailed tables for Missouri's counties are available for reference purposes at the Division of Budget and Planning, the Missouri State Library, and the Public Affairs Information Service. In addition, the twenty regional planning commissions have a copy of the county data for the counties in their respective regions. Copies of the county data may be purchased at cost from the Public Affairs Information Service.

The methodology used in deriving the employment data is described in the appendix.

## OVERVIEW

The distribution of employment by industry in Missouri has changed considerably over the thirty year period, 1940 to 1970. Chart 2 illustrates the decline in importance of the agricultural sector and the increase in importance of services, manufacturing and trade. In addition, the distribution of employment by industry differs considerably from region to region within Missouri. This report outlines the major changes that have occurred and illustrates the major differences between regions.

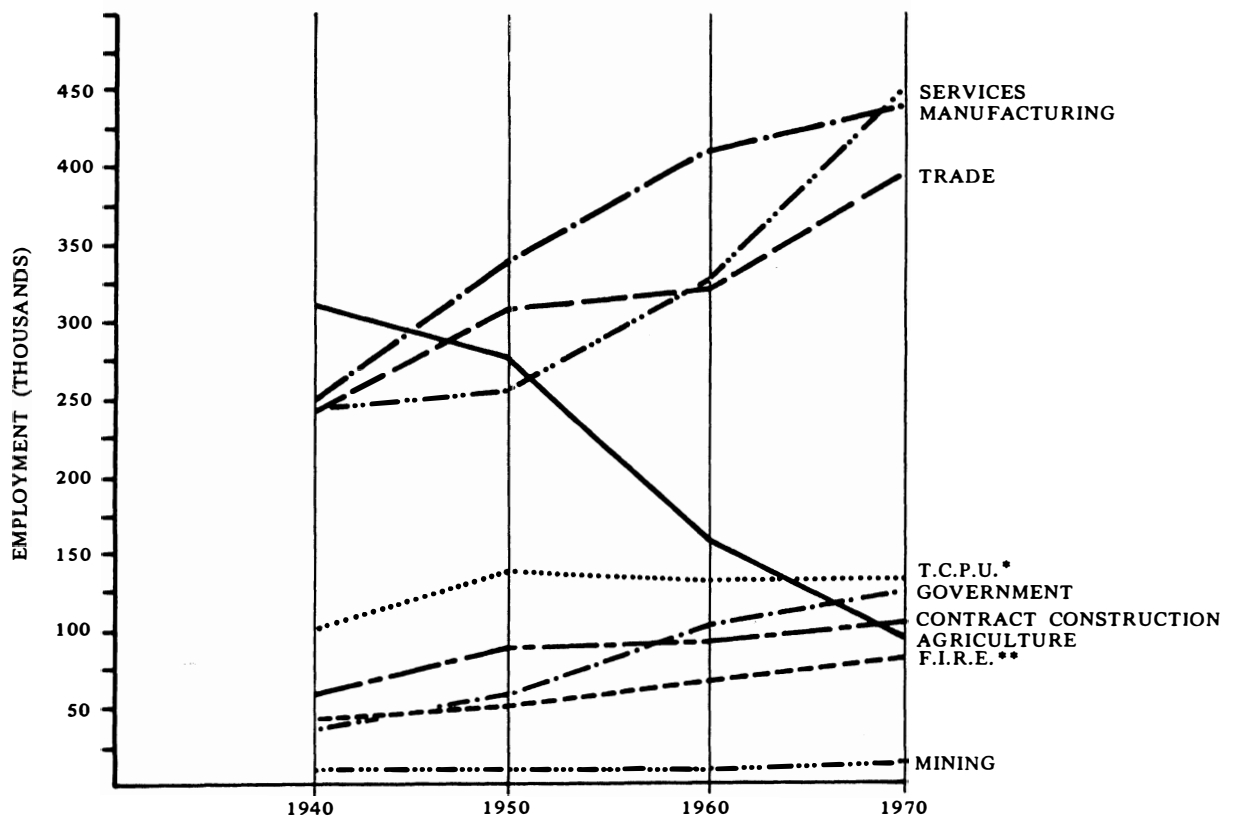

In 1940, total employment by region ranged from 12,084 in the Boonslick region to 457,898 in the East-West Gateway region. By 1970, employment in both areas had increased—Boonslick to 13,666 and East-West Gateway to 716,676—and they maintained their rankings, twentieth and first, respectively. Chart 3 and Table 1 show the rankings of each of the regions in terms of total employment for 1970 and 1940. Lake of the Ozarks region had the greatest increase in rank in total employment over that period, from nineteenth to fifth. Three regions: Green Hills, Mark Twain, and Bootheel, each dropped four places in the rankings in total employment, from eighth to twelfth, from sixth to tenth and from fourth to eighth, respectively.

Nine regions actually had less employment in 1970 than in 1940. Five of the nine regions showing declines were in the northern part of the state (Northwest, Green Hills, Missouri Valley, Northeast, Mark Twain) and three were in the southeast portion of Missouri (South Central Ozark, Ozark Foothills, Bootheel). The ninth region showing a loss in employment was Kaysinger Basin.

Of the nine major industrial groupings (agriculture, agricultural services, forestry and fisheries; mining; contract construction; manufacturing; transportation, communication and public utilities; wholesale and retail trade; finance, insurance and real estate; services and total government) the agricultural category had the largest share of employment in Missouri as a whole and in eighteen of the regions in 1940. The two exceptions were the regions containing Missouri's largest cities, namely, East-West Gateway (manufacturing was largest) and Mid-America (wholesale and retail trade was largest). By 1970, the services sector had the largest share of employment in Missouri and in thirteen of the regions. Manufacturing was the largest sector in five regions (East-West Gateway, Boonslick, Mo-Kan, Ozark Gateway and South Central Ozark), the government sector was largest in Lake of the Ozarks region, and the agriculture sector remained dominant only in the Green Hills region. Chart 4

**TOTAL EMPLOYMENT AND REGIONAL RANK**  
**(Employment in Thousands — Rank in Parentheses)**

AREA	1940	1950	1960	1970
Missouri	1297.1	1524.7	1605.7	1820.5
Boonslick	12.1 (20)	12.9 (20)	11.7 (20)	13.7 (20)
Bootheel	60.1 (4)	63.7 (5)	54.4 (5)	49.1 (8)
East-West Gateway	457.9 (1)	564.0 (1)	614.9 (1)	716.7 (1)
Green Hills	42.0 (8)	40.8 (10)	35.1 (11)	32.6 (12)
Kaysinger Basin	33.2 (11)	34.6 (11)	30.3 (13)	29.6 (14)
Lake of the Ozarks	17.4 (19)	21.4 (17)	46.9 (6)	54.2 (5)
Mark Twain	49.5 (6)	48.6 (7)	44.9 (8)	43.6 (10)
Meramec	23.2 (14)	26.0 (14)	26.6 (15)	30.4 (13)
Mid-America	215.2 (2)	271.2 (2)	312.9 (2)	369.7 (2)
Missouri Valley	21.3 (16)	20.8 (18)	18.4 (17)	18.7 (17)
Mo-Kan	44.1 (7)	48.8 (6)	45.9 (7)	44.5 (17)
Northeast Missouri	18.1 (18)	18.1 (19)	16.3 (19)	17.5 (19)
Northwest Missouri	22.8 (15)	22.2 (15)	19.0 (16)	19.4 (16)
Ozark Foothills	19.1 (17)	21.6 (16)	17.4 (18)	17.8 (18)
Ozark Gateway	39.3 (10)	47.4 (8)	44.8 (9)	49.4 (7)
Show-Me	26.1 (13)	30.4 (13)	33.1 (12)	37.6 (11)
South Central Ozark	29.1 (12)	33.1 (12)	28.1 (14)	27.6 (15)
Southeast Missouri	39.4 (9)	47.4 (9)	44.4 (10)	49.6 (6)
Southwest Missouri	67.7 (3)	83.9 (3)	88.3 (3)	106.3 (3)

and Table 2 show the largest industry sector in each of the regions in 1940 and 1970. In the eighteen regions where agriculture was largest in terms of employment in 1940, agricultural employment as a percent of total regional employment ranged from as much as 62 percent of total employment (South Central Ozark), to as little as 22 percent of total regional employment (Mo-Kan). In 1970, the largest share of employment in any region was the government sector share in Lake of the Ozarks—53 percent. The largest share for the services sector in 1970 was 36 percent in the Mid-Missouri region.

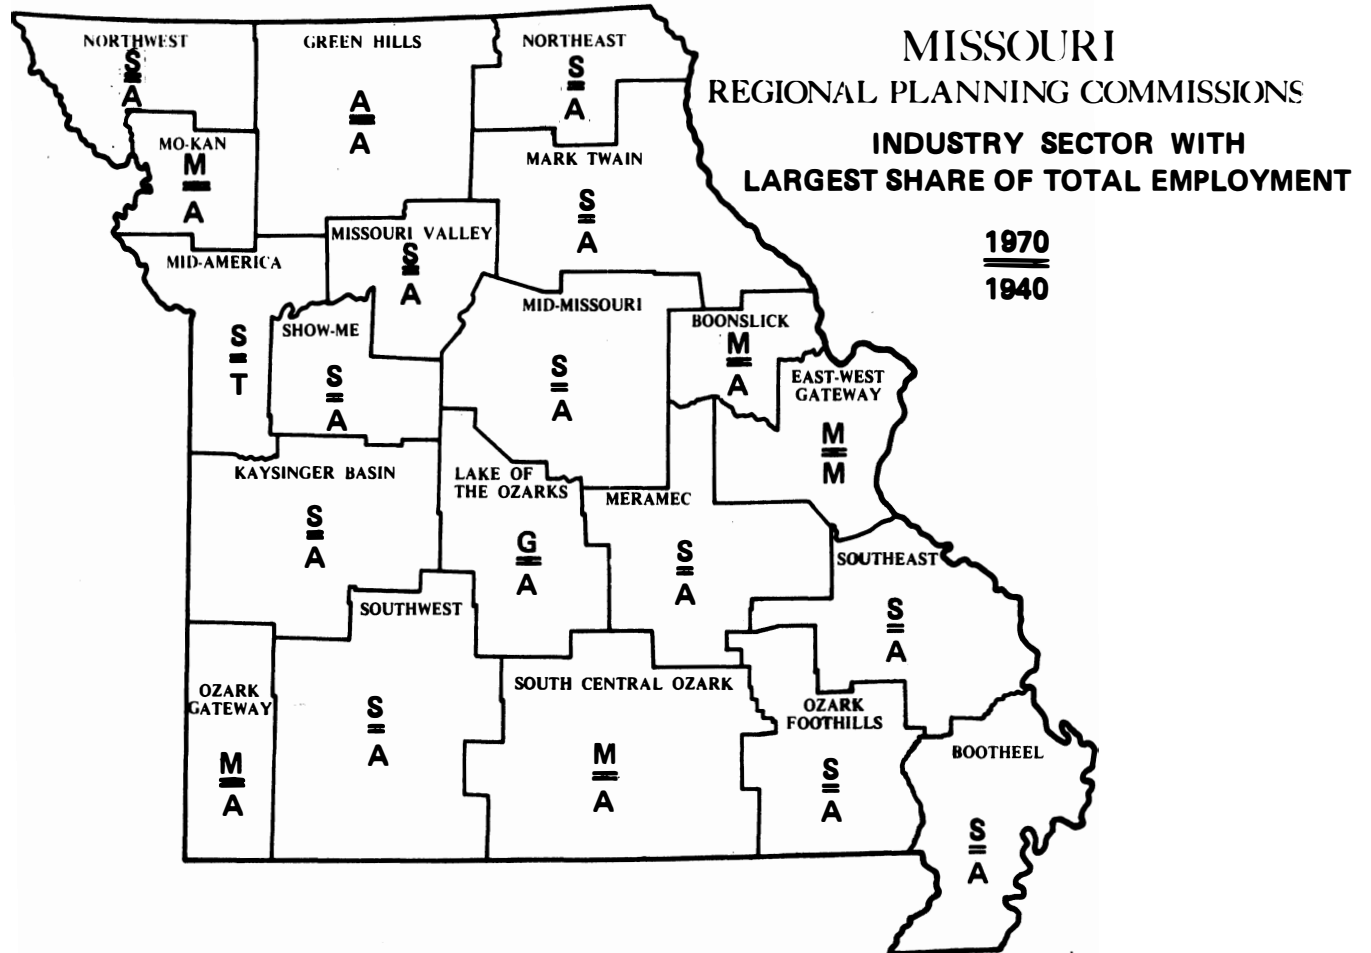

Total employment in Missouri amounted to 2.86 percent of total employment in the United States in 1940 and by 1970 had decreased to 2.30 percent. The largest share for Missouri of U.S. employment in 1940 occurred in the trucking and warehousing category (4.16 percent). In 1970, Missouri's largest share was in the motor vehicles and motor vehicle equipment category (3.35 percent).

When the regions' shares of Missouri employment are examined, the first ranked region (East-West Gateway) increased its share from 35.30 percent in 1940 to 39.37 percent in 1970. The twentieth ranked region (Boonslick) decreased its share of total state employment from 0.93 percent in 1940 to 0.75 percent in 1970. Chart 5 and Table 3 show the regional rankings and percent of Missouri's employment in 1970. East-West Gateway had almost twice the share of the second largest region — Mid-America — and Mid-America had nearly four times the share of the third largest region — Southwest. East-West Gateway's largest share of Missouri employment in 1970 occurred in the transportation equipment except motor vehicles category. (86.09 percent). In 1970, Lake of the Ozarks region had 73.64 percent of Missouri's federal military employment. The only other region which had more than 50 percent of Missouri's employment in a category in 1970 was Mid-America, which had 63.05 percent of Missouri's petroleum refining and related industries employment.

Over the thirty year period from 1940 to 1970 (see Table 4), the percent of Missouri's population that was employed increased from 34.27 percent to 38.92 percent. In 1940, the region with the smallest percentage of its population employed was Ozark Foothills (25.37 percent) and the region with the largest percentage employed was East-West Gateway (38.75 percent). Chart 6 shows the 1970 rankings and percent of the population employed for the twenty regions. Lake of the Ozarks was ranked first in 1970 with 48.26 percent of its population employed and Ozark Foothills again was twentieth with only 28.73 percent of its population employed.

From 1940 to 1950, total employment in Missouri increased 17.54 percent (see Table 5). The region with the largest percentage increase in employment in the 1940's was

Show-Me	31.49	39.23	37.00	39.64
South Central Ozark	26.05	33.26	32.17	31.63
Southeast Missouri	29.60	36.26	33.68	35.33
Southwest Missouri	29.25	36.02	36.24	37.56

Mid-America (26.00 percent) and the region with the largest decrease was Green Hills (−2.99 percent). From 1950 to 1960, employment in Missouri increased 5.32 percent. The region with the largest percentage increase in employment in the fifties was Lake of the Ozarks (119.11 percent) and the region with the largest decrease was Ozark Foothills (−19.84 percent). During the decade of the sixties, employment in Missouri increased 13.38 percent. Mid-Missouri had the largest percentage increase in employment of all of the regions (27.48 percent) over the sixties and Bootheel had the largest decrease (−9.71 percent). Seven regions had an increase in employment each decade (Mid-America, Show-Me, Mid-Missouri, East-West Gateway, Meramec, Lake of the Ozarks and Southwest) and three regions had a decrease in employment each decade (Green Hills, Northeast and Mark Twain). Chart 7 shows which regions increased in employment and which decreased and those that both increased and decreased over the thirty years.

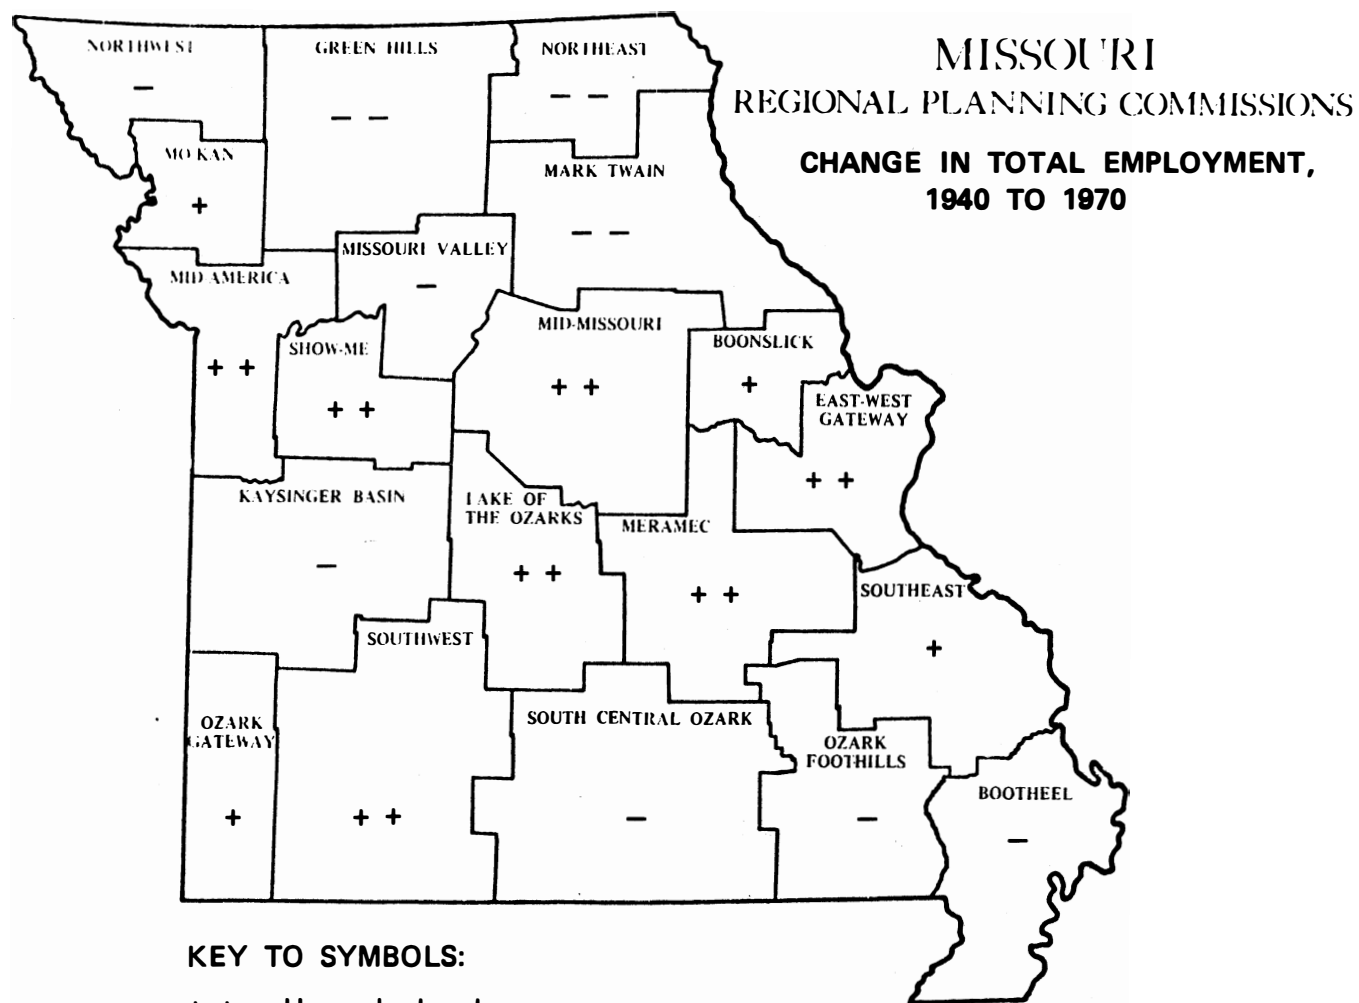

Location quotients were calculated for Missouri in relation to the United States and for the twenty regions in relation to Missouri as a whole. In 1940, Missouri's largest location quotient for an industrial group was 1.451 in the trucking and warehousing category and its lowest was 0.070 in the textile mill products category (a value of 1.00 indicates the employment share is the same in both areas). In 1970, Missouri's largest location quotient was 1.459 in the motor vehicles and motor vehicle equipment category and its smallest was 0.124, again in the textile mill products category.

The region in 1940 with the largest location quotient was Ozark Foothills which had a value of 11.382 in the forestry and fisheries category (see Table 6). Other regions in 1940 which had relatively large location quotients were: Lake of the Ozarks (7.049 in the forestry and fisheries category); Meramec (5.596 in the mining category); and Southeast (7.262 in the mining category). In 1970, the region with the largest location quotient was Lake of the Ozarks, which had a value of 24.728 in the federal military category. Other regions in 1970 which had relatively large location quotients were: Meramec (9.973 in the mining category); Ozark Foothills (14.511 in the forestry and fisheries category); South Central Ozark (13.565 in the forestry and fisheries category); and Southeast (8.079 in the mining category). Chart 8 shows the largest location quotients for industrial groups for each of the regions in 1970 and 1940.

Missouri's twenty regions are thus quite different in their structure of employment. Some of the regions are showing increasing employment and others are showing decreasing employment. Nearly all regions have had a change in their dominant industry in the period 1940 to 1970. The tables which follow are grouped by region, beginning with Missouri as a whole.

**INDUSTRY DIVISIONS INCLUDED IN INDUSTRY SECTORS  
LISTED IN DETAILED TABLES AND ABBREVIATIONS USED**

INDUSTRY SECTOR		INDUSTRY DIVISION	
1.	Agriculture, agricultural services, forestry and fisheries (abbreviated Agriculture, agric. svcs., for. and fish.)	i.	Agriculture, forestry, and fisheries
2.	Mining	ii.	Mining
3.	Contract construction	iii.	Construction
4.	Manufacturing	iv.	Manufacturing durable goods
		v.	Manufacturing nondurable goods
5.	Transportation, communication, and public utilities (abbreviated Transportation, commun. and pub. utils.)	vi.	Transportation, communication, and public utilities
6.	Wholesale and retail trade	vii.	Wholesale trade
		viii.	Retail trade
7.	Finance, insurance, and real estate	ix.	Finance, insurance, and real estate
8.	Services	x.	Personal services
		xi.	Business and repair services
		xii.	Entertainment and recreation services
		xiii.	Professional and related services
9.	Total government	xiv.	Public administration
		xv.	Federal military

**APPENDIX**  
**EMPLOYMENT METHODOLOGY**

**SOURCE:** U. S. Department of Commerce, Bureau of Economic Analysis, *Regional Employment by Industry, 1940–1970*, pp. iv–x.

In 1965, the Bureau of Economic Analysis (then the Office of Business Economics) published *Growth Patterns in Employment by County, 1940-1950 and 1950-1960*, regional volumes 1-8. These volumes contained employment by county, state and region by industry for 1940, 1950 and 1960, as well as an analysis of changes in employment over each of the two decades. With the publication of the 1970 Census of Population, employment data for another decennial census point became available. There have been numerous requests for the additional data in a format compatible with the previously published series. Moreover, the Bureau's regional projections program and other analytical applications rely on the Census Bureau's county employment series for a portion of their historical basis. This has generated a substantial demand for the employment data at the county level.

This volume presents employment by industry by county from the decennial censuses of population for 1940, 1950, 1960 and 1970. These employment data are drawn from the resident, as opposed to the *de jure*, population of the United States. Thus, federal military and federal civilian employees stationed overseas are excluded.

### **EMPLOYMENT DEFINED**

The census of population in 1970 defined employment as follows:

"Employed persons comprise all civilians 16 years old and over who were either (a) 'at work'—those who did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) were 'with a job but not at work'—those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations." <sup>1</sup>

The labor force definition in the censuses of population for 1940, 1950 and 1960 covered persons 14 years old and over. Since the relevant questions were put to all persons 14 years and over in the 20 percent sample of 1970, it was possible to obtain a special tabulation of civilian employees 14 years of age and over for comparability with the three previous census enumerations.

In addition to employed civilians, the data include those on active duty in the federal military. Data on the federal military were explicitly included in the censuses of population for 1970,<sup>2</sup> 1960 and 1950. In the census of population for 1940, however, the federal military were counted as part of "government" for local areas. In order to provide this information as a separate industrial item, the Bureau of the Census prepared an estimate of

federal military by county in 1940. This estimate was then subtracted from the count of “government” employees.

Through inclusion of federal military, the information presented here is broader than that for the civilian employed. At the same time, it falls short of the total labor force, since it does not include the unemployed. The federal military were included to present a more complete manpower picture in its national, regional, state and local dimensions.

### **INDUSTRIAL CLASSIFICATION FOR CIVILIAN EMPLOYEES**

While information in the present compilation is drawn from the last four censuses of population, it has not been published in precisely the form in which it now appears. The previous publication nearest to present form was *Growth Patterns in Employment by County 1940-1960 and 1950-1960* published by region in eight volumes in 1965 by the Office of Business Economics.<sup>3</sup> In that publication, in order to achieve a high degree of comparability for data from the censuses of 1940, 1950 and 1960, some industrial categories were combined. The resulting comparable set included 30 identified civilian categories plus an industry-not-reported line. Subsequently, five additional industry groups were added for 1950 and 1960,<sup>4</sup> bringing the total to 35 identified civilian industries plus an industry-not-reported line. Comparable data were available for 1970 from the special tabulation mentioned above.

In the present publication, 35 identified civilian industries are presented for each area for 1970, 1960 and 1950, together with 30 groups for 1940. Since the industry-not-reported line has been distributed to the other civilian groups,<sup>5</sup> individual industry groups have been changed while the civilian total across these groups remains unaffected. To make clear the total employment allocated, however, the former industry-not-reported is shown as the last line on each table.<sup>6</sup>

Incomparabilities in industries published in the several censuses arise from two major sources: First, the structure of industrial detail presented changes from one census to another; and second, the industrial classification of some economic activities undergoes change between censuses. Industrial combinations correct most of the incomparabilities arising from the first source. There remain incomparabilities attributable to the second. Changes have been made in the industrial classification system for each of the three decennial censuses since 1940 which limit the comparability of the data from one census to another. Thus, caution should be exercised to avoid placing great stress on the significance of small changes in industrial sectors' over time.

The appendix table shows for each industrial group the code designation of the similar groups in the Standard Industrial Classification (SIC). This relationship is presented for

**general** information purposes only and does not imply complete comparability. The SIC developed under the direction of the Office of Management and Budget, is designed for the classification of reports from industrial establishments. The information in these reports is by its nature and degree of detail considerably different from the information obtained by the census of population from household enumeration.

A major difference between the two systems exists in the handling of government employees. The SIC classifies all government agencies in a single and separate major group. The data of this report (necessarily following census practice), place government workers in the same industries as private workers in similar industrial pursuits. Public administration, the 35th industry group, in the tables of this report, includes only those civilian employees of agencies which have uniquely governmental functions such as legislative, executive and judicial, whether federal, state or local.

### **PLACE OF RESIDENCE**

An important characteristic of the census of population is that it reports employment by place of residence of the employee, even though in some cases place of residence is determined by convention.<sup>7</sup> Certain other series—such as the establishment data of the Bureau of Labor Statistics and the establishment data of the Social Security Administration—present employment by place of work. The characteristics of these related series are described in other governmental documents.<sup>8</sup>

Even assuming that employment concepts are identical, the growth performance of a county as a place of employee residence may well differ from its growth performance as a place of employee work. For groups of counties forming a natural labor market, however, these performance differences tend to be diminished. The differences also are diminished if not eliminated through the use of economic areas. Economic areas are defined in such a way that commuting across economic area boundaries between place of work and place of residence is minimized. Each economic area, as defined by the Bureau of Economic Analysis, is formed from a grouping of counties centered on one or more metropolitan areas.<sup>9</sup>

### **SEASONAL FACTOR**

The enumerations of the census of population are taken in each decennial census year at or near April 1. Such a count is, therefore, for many areas, somewhat different from one taken at a more active point in the employment season. Thus, the levels presented here are seasonally lower in some areas than would be annual data consisting of averages of monthly values. These and other measurement factors explain the differences between the employment levels from the decennial census of population (as presented in this study) and those from the Bureau of the Census' current population survey which forms the statistical basis for the monthly report on the labor force.<sup>10</sup>

# APPENDIX TABLE – Industrial Groups and Standard Industrial Classification Equivalents<sup>1</sup>

<u>Industrial Group</u>		<u>Approximate SIC Code Equivalents</u>	
<u>Total Employment</u>			
Agriculture, agricultural services, forestry and fisheries			
1	Agriculture and agricultural services	01	Agricultural production
		07	Agricultural services and hunting and trapping, except 0713
2	Forestry and fisheries	08	Forestry
		09	Fisheries
3	Mining	10	Metal mining
		11	Anthracite mining
		12	Bituminous coal and lignite mining
		13	Crude petroleum and natural gas
		14	Mining and quarrying of nonmetallic minerals, except fuels
4	Contract construction	15	Building construction—general contractors
		16	Construction other than building construction—general contractors
		17	Construction—special trade contractors
Manufacturing			
5	Food and kindred products	0713	Grist mills, including custom flour mills
		20	Food and kindred products
6	Textile mill products	22	Textile mill products
7	Apparel and other fabricated textile products	23	Apparel and other finished products made from fabrics and similar materials
8	Lumber, wood products and furniture	24	Lumber and wood products, except furniture
		25	Furniture and fixtures
9	Printing, publishing and allied industries	27	Printing, publishing, and allied industries

# APPENDIX TABLE (Continued)

10	Chemicals and allied products	28	Chemicals and allied products
	Machinery, all		
11	Machinery except electrical	35	Machinery except electrical
12	Electrical machinery, equipment and supplies	36	Electrical machinery, equipment, and supplies
13	Motor vehicles and motor vehicle equipment	371	Motor vehicles and motor vehicle equipment
14	Transportation equipment except motor vehicles	37	Transportation equipment, except 371
	Other and miscellaneous manufacturing		
15	Paper and allied products	26	Paper and allied products
16	Petroleum refining and related industries	29	Petroleum refining and related industries
17	Primary metal industries	33	Primary metal industries
18	Fabricated and not specified metals	34	Fabricated metals products, except ordnance, machinery, and transportation equipment
19	Miscellaneous manufacturing	19	Ordnance and accessories
		21	Tobacco manufactures
		30	Rubber and miscellaneous plastic products
		31	Leather and leather products
		32	Stone, clay, glass and concrete products
		38	Professional, scientific, and controlling instruments; photographic and optical goods; watches and clocks
		39	Miscellaneous manufacturing industries
	Transportation, communication and public utilities		
20	Railroads and railway express	40	Railroad transportation

# APPENDIX TABLE (Continued)

21	Trucking and warehousing	42	Motor freight transportation and warehousing
22	Other transportation	41	Local and Suburban transit and interurban highway passenger transportation
		44	Water transportation
		45	Transportation by air
		46	Pipeline transportation
		47	Transportation services
23	Communication	48	Communication
24	Electric, gas and sanitary services	49	Electric, gas and sanitary services
	Wholesale and retail trade		
25	Wholesale trade	50	Wholesale trade
26	Food and dairy products stores	54	Food stores
27	Eating and drinking places	58	Eating and drinking places
28	Other retail trade	52	Building materials, hardware and farm equipment dealers
		53	Retail trade—general merchandise
		55	Automotive dealers and gasoline service stations
		56	Apparel and accessory stores
		57	Furniture, home furnishings and equipment stores
		59	Miscellaneous retail stores
29	Finance, insurance and real estate	60	Banking
		61	Credit agencies other than banks
		62	Security and commodity brokers, dealers, exchanges, and services
		63	Insurance carriers
		64	Insurance agents, brokers, and service
		65	Real estate
		66	Combinations of real estate, insurance, loans, law offices
		67	Holding and other investment companies

## APPENDIX TABLE (Continued)

Services	
30	Lodging places and other personal services
	70 Hotels, rooming houses, camps and other lodging places
	72 Personal services
31	Business and repair services
	73 Miscellaneous business service
	75 Automobile repair, automobile services, and garages
	76 Miscellaneous repair services
32	Entertainment and recreation services
	78 Motion pictures
	79 Amusement and recreation services, except motion pictures
33	Private households
	88 Private households
34	Professional services
	80 Medical and other health services
	81 Legal services
	82 Educational services
	84 Museums, art galleries, botanical and zoological gardens
	86 Nonprofit membership organizations
	89 Miscellaneous services
Total government	
35	Public administration
	91 Federal government except 9190 (part)
	92 State government
	93 Local government
36	Federal military
	9190 Federal government (part)
INDUSTRY NOT REPORTED	
	99 Nonclassifiable establishments

<sup>1</sup>These Standard Industrial Classification Code Equivalents are adapted from U.S. Bureau of the Census, Census of Population: 1970. General Social and Economic Characteristics, Final Report PC(1)-C1., U.S. Government Printing Office, Washington, D.C., 1972, App. B-22 to B-25. Their exact wording, however, is taken from Executive Office of the President, Bureau of the Budget, Standard Industrial Classification Manual, U.S. Government Printing Office, Washington, D.C. 1967.

As indicated in the Census of Population reference above, "Changes have been made in the classification systems for each of the three decennial censuses since 1940, which limit the comparability of the data from one census to another." It is for this reason that this publication attempts to enhance comparability through combinations of industry groups and specific adjustments as indicated in Appendix Table. Nevertheless, some incomparabilities remain. Moreover, the basic Census and SIC systems remain fundamentally different in the industrial classification of government employees.

## FOOTNOTES

<sup>1</sup>U. S. Department of Commerce, Bureau of the Census, *Census of Population: 1970. General Social and Economic Characteristics*. Final Report PC (1)–C1 United States Summary, Appendix B–16, U. S. Government Printing Office, Washington, D. C. 1972.

<sup>2</sup>U. S. Department of Commerce, Bureau of the Census, *Census of Population: 1970. General Social and Economic Characteristics*. Final Report PC (1)–C1 United States Summary, Appendix B–16.

Also note that since the age bracket 14–15 is not represented in the Federal military, the tabulation 14 years of age and over is conceptually the same as that for Federal military 16 years of age and over in 1970. Also see note below.

<sup>3</sup>Hereafter referred to as *Growth Patterns 1965*.

<sup>4</sup>Electrical and other machinery was divided into machinery, except electrical and electrical machinery, equipment and supplies, using published census data. Four additional groups (paper and allied products, petroleum and related industries, primary metal industries and fabricated and not specified metals) were broken out of the other and miscellaneous manufacturing group, using published census and other data.

<sup>5</sup>Industry not reported has never been associated with the Federal military because the later is more an easily identified employment status than an industrial category. Thus, it is thought to be highly infrequent than an industry-not-reported employee would be properly classified as a member of the Federal military.

<sup>6</sup>The allocation of industry not reported to other civilian categories was made possible by the 1970 special tabulation. In addition to the presentation of materials for the 35 civilian industry groups, this tabulation showed allocations of the industry not reported to 14 major industry divisions. This was done on the basis of a data processing convention which assigned records lacking an industry classification to a most probable industry division. (See U. S. Department of Commerce, Bureau of the Census, *Census of Population: 1970. General Social and Economic Characteristics*. Final Report PC (1)–C1 United States Summary, Appendix B–24.) The 14 major industry divisions and the groups they encompass are as follows:

## FOOTNOTES (Continued)

<u>INDUSTRY DIVISION</u>	<u>INDUSTRY GROUPS INCLUDED</u>
Agriculture, forestry, and fisheries	Agriculture and agricultural services Forestry and fisheries
Mining	Mining
Construction	Contract construction
Manufacturing durable goods	Lumber, wood products, and furniture Machinery, except electrical Electrical machinery, equipment and supplies Motor vehicles and motor vehicle equipment Transportation equipment except motor vehicle Primary metal industries Fabricated and not specified metals Miscellaneous manufacturing (durable)
Manufacturing nondurable goods	Food and kindred products Textile mill products Apparel and other fabricated textile products Printing, publishing, and allied industries Chemicals and allied products Paper and allied products Petroleum refining and related industries Miscellaneous manufacturing (nondurable)
Transportation, communication, and public utilities	Railroads and railway express Trucking and warehousing Other transportation Communication Electric, gas, and sanitary services
Wholesale trade	Wholesale trade

## FOOTNOTES (Continued)

<u>INDUSTRY DIVISION</u>	<u>INDUSTRY GROUPS INCLUDED</u>
Retail trade	Food and dairy products stores Eating and drinking places Other retail trade
Finance, insurance, and real estate	Finance, insurance and real estate
Personal services	Lodging places and other <del>personal</del> services Private households
Business and repair services	<del>Business and</del> repair services
Entertainment and recreation services	<del>Entertainment and recreation</del> services
Professional and related services	Professional services
Public administration	Public administration

Several additional steps completed the allocation as follows:

- a. In 1970 each major division allocate as determined by the Bureau of the Census was divided into not reported elements proportional to the subsidiary industry groups.
- b. The not reported elements developed in (a) were divided by their corresponding preallocate industry groups to derive ratios. To accommodate the differing industrial structure in 1940, such ratios were also developed for "Machinery, all" and for "Other and Miscellaneous manufacturing."
- c. The ratios in (b) were multiplied by the corresponding preallocate industry groups in 1960, 1950, and 1940, to derive approximate not reported elements. These latter were used as allocators for total industry not reported to derive final not reported elements.
- d. Final not reported elements developed in (c) were added to the corresponding preallocate employment values to obtain postallocation employment levels.

## FOOTNOTES (Continued)

<sup>7</sup>“Members of the Armed Forces living on military installations were counted, as in every previous census, as residents of the area in which the installation was located. Similarly, members of the Armed Forces not living on a military installation were counted as residents of the area in which they were living . . .

“College students, as in 1950 and 1960, were counted as residents of the area in which they were living while attending college. Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where this institution was located; on the other hand, patients in general hospitals who ordinarily remain for short periods of time, were counted at their home . . .
